

Health and safety training

What you need to know

*This is a web-friendly
version of leaflet
INDG345, reprinted 06/08*

This leaflet explains the importance of health and safety training to owners and managers of businesses. It gives advice on who may need training, what form the training may take and how to organise it.

Why is health and safety training important?

Over 200 people are killed each year in accidents at work and over one million people are injured. Over two million suffer illnesses caused by, or made worse by, their work.

Preventing accidents and ill health caused by work is a key priority for everyone at work. As the owner or manager of a business you know that competent employees are valuable.

Providing health and safety information and training helps you to:

- ensure your employees are not injured or made ill by the work they do;
- develop a positive health and safety culture, where safe and healthy working becomes second nature to everyone;
- find out how you could manage health and safety better;
- meet your legal duty to protect the health and safety of your employees.

Effective training:

- will contribute towards making your employees competent in health and safety;
- can help your business avoid the distress that accidents and ill health cause;
- can help you avoid the financial costs of accidents and occupational ill health. Don't forget that your insurance doesn't cover all these costs. Damaged products, lost production and demotivated staff can all result.

The law requires that you provide whatever information, instruction and training is needed to ensure, so far as is reasonably practicable, the health and safety of your employees (see 'The Law' for more details).

What is training?

Training means helping people to learn how to do something, telling people what they should or should not do, or simply giving them information. Training isn't just about formal 'classroom' courses.

Who needs health and safety training?

You do! Whether you are an employer or self-employed, are you sure that you're up to date with how to identify the hazards and control the risks from your work? Do you know how to get help – from your trade association, your local Chamber of Commerce, or your health and safety enforcing authority? Do you know what you have to do about consulting your employees, or their representatives, on health and safety issues? If not, you would probably benefit from some training.

Your managers and supervisors do! If you employ managers or supervisors they will certainly need some training. They need to know what you expect from them in terms of health and safety, and how you expect them to deliver. They need to understand your health and safety policy, where they fit in, and how you want health and safety managed. They may also need training in the specific hazards of your processes and how you expect the risks to be controlled.

Your employees do! Everyone who works for you, including self-employed people, needs to know how to work safely and without risks to health. Like your supervisors, they need to know about your health and safety policy, your arrangements for implementing it, and the part they play. They also need to know how they can raise any health and safety concerns with you.

You should:

- take into account the capabilities, training, knowledge and experience of workers; and
- ensure that the demands of the job do not exceed their ability to carry out their work without risk to themselves and others.

Some employees may have particular training needs, for example:

- new recruits need basic induction training into how to work safely, including arrangements for first aid, fire and evacuation;
- people changing jobs or taking on extra responsibilities need to know about any new health and safety implications;
- young employees are particularly vulnerable to accidents and you need to pay particular attention to their needs, so their training should be a priority. It is also important that new, inexperienced or young employees are adequately supervised;
- some people's skills may need updating by refresher training.

Your risk assessment should identify any further specific training needs.

How can I do it?

Firstly, you should show your commitment so the people being trained recognise that the training is important. Providing training needn't be a great burden, but you do need to think ahead and prioritise. You may have appointed somebody to give you 'competent assistance' (see 'The Law') and they should be able to help. Try the following five-step approach:

STEP 1 Decide what training your organisation needs

- Identify the skills and knowledge needed for people to do their job in a safe and healthy way. Compare these against people's current skills and knowledge and identify the gaps.
- Review your experience of injuries, near misses or cases of ill health.
- Look at your risk assessments to see where information and/or training have been identified as factors in controlling risks.
- Consult employees or their representatives for their views.
- Consider awareness training needs for directors, managers and supervisors, including:
 - how you manage health and safety;
 - who is responsible for what;
 - the cost to the business if things go wrong;
 - how to identify hazards and evaluate risks; and
 - the hazards encountered and measures for controlling them.

STEP 2 Decide your training priorities

- Does the law require you to carry out specific training (eg first-aid training)? See 'The Law' for more details.
- Top priorities would include those where lack of information and/or training might result in serious harm, and those which benefit the largest numbers of staff.
- Consult employees or their representatives for their views.
- Training for new recruits and for people changing jobs or taking on new responsibilities should always be a priority.

STEP 3 Choose your training methods and resources

Don't forget that though there are many external trainers who can help you, much effective training can be done 'in house'.

- Choose your methods, for example:
 - giving information or instruction;
 - coaching or on-the-job training;
 - training in the 'classroom';
 - open and distance learning;
 - in groups or individually; and
 - computer-based or interactive learning.
- Consider who can help you, by providing information, materials, training courses etc. You could try for example:
 - Sector Skills Councils (www.sscalliance.org.uk);
 - UK Commission for Employment and Skills (UKCES)(www.ukces.org.uk);
 - trade unions or trade associations;
 - further education colleges;
 - private training organisations;
 - independent health and safety consultants;
 - employer bodies (eg Chambers of Commerce); and
 - qualification-awarding bodies. To find a course leading to an accredited health and safety qualification look at the Qualifications and Curriculum Authority website www.qca.org.uk/qualifications.

- Look at www.businesslink.gov.uk and click on 'Employing people' or call 0845 600 9006 to find detailed information and advice on skills and training, including:
 - the impact of training on business performance;
 - identifying training needs;
 - training methods;
 - how to set up in-house training;
 - how to evaluate your training;
 - how to find a training provider or course; and
 - learning through networking with others.

STEP 4 Deliver the training

- Ensure the information is easy to understand and try to use a variety of training methods to deliver your message.
- Ensure the trainer has enough time to prepare themselves, their resources and the venue – preparation is particularly important for people who are not experienced trainers.

STEP 5 Check that the training has worked

- Do your employees understand what you require of them?
- Do they now have the knowledge and skills needed to work safely and without risk to health?
- Are they actually working as they have been trained?
- Has there been any improvement in your organisation's health and safety performance?
- What feedback are you getting from line managers and the people who have been trained?
- Is further information and/or training needed?
- Was the most suitable training method used?
- What improvements can be made?
- Has there been a change in behaviour and practice?
- It is important to keep records of training, even in-house training.
- You should monitor training records so that refresher training can be given when needed.

The law

The **Health and Safety at Work etc Act 1974** requires you to provide whatever information, instruction, training and supervision as is necessary to ensure, so far as is reasonably practicable, the health and safety at work of your employees.

This is expanded by the **Management of Health and Safety at Work Regulations 1999**, which identify situations where health and safety training is particularly important, eg when people start work, on exposure to new or increased risks and where existing skills may have become rusty or need updating.

You must provide training during working hours and not at the expense of your employees. Special arrangements may be needed for part-timers or shift workers.

You need to assess the risks to your employees while they are at work and to any other people who may be affected by the way you conduct your business. This is

so that you can identify the measures you need to take to comply with health and safety law, which includes training and the provision of information.

Like many employers, you may not be in a position to provide this training on your own, in which case you will need competent help. If possible, you should appoint one or more of your employees. However, if there is no one with the relevant knowledge, experience and skills in your organisation who can be relied on to deal effectively with health and safety training, you need to enlist someone from outside. In some circumstances you may need a combination of internal and external help. Look at HSE's pocket card INDG420 *Getting specialist help with health and safety* for advice. Also look at www.businesslink.gov.uk for detailed advice on choosing and managing a health and safety consultant.

The Safety Representatives and Safety Committees Regulations 1977 and **the Health and Safety (Consultation with Employees) Regulations 1996** require you to consult your employees, or their representatives, on health and safety issues. Representatives appointed under either of these sets of regulations are entitled to time off with pay for training in their duties.

The Health and Safety (Training for Employment) Regulations 1990 ensure that learners doing work experience are covered by health and safety law.

There are a number of other regulations which include specific health and safety training requirements, eg asbestos, diving and first aid.

What about self-employed people?

If a person working under your control and direction is treated as self-employed for tax and national insurance purposes, they may nevertheless be treated as your employee for health and safety purposes. You may need therefore to take appropriate action to protect them.

If you do not wish to employ workers on this basis, you should seek legal advice. Ultimately each case can only be decided on its own merits by a court of law.

How else can HSE help?

HSE has produced some useful publications. A suitable starting point is *Effective health and safety training: A trainer's resource pack* (HSE Books 2001 ISBN 978 0 7176 2109 5). This includes a series of practical activities that you can use to help train your staff in:

- health and safety policies, culture and systems;
- roles in health and safety;
- assessing and controlling risks; and
- managing change and improvement.

Thinking of setting up or joining a Health and Safety Passport training scheme? Read *Passport schemes for health, safety and the environment: A good practice guide* Leaflet INDG381 HSE Books 2003 (single copy free).

Do you offer work experience to young people? Look at www.hse.gov.uk/youngpeople/index.htm.

You can use HSE's most popular, easy-to-follow book *Essentials of health and safety at work* as a training manual ISBN 978 0 7176 6179 4 HSE Books 2006.

Useful websites

- www.learndirect.co.uk will help you find health and safety training courses (Tel: 08000 150 450).
- www.learndirectscotland.com can help you find a training course in Scotland (Tel: 0808 100 9000).
- www.smallbusinessjourney.com has information on training and examples from businesses which have benefited by training their workers.

Further information

HSE priced and free publications are available by mail order from HSE Books, PO Box 1999, Sudbury, Suffolk CO10 2WA Tel: 01787 881165 Fax: 01787 313995 Website: www.hsebooks.co.uk (HSE priced publications are also available from bookshops and free leaflets can be downloaded from HSE's website: www.hse.gov.uk.)

For information about health and safety ring HSE's Infoline Tel: 0845 345 0055 Fax: 0845 408 9566 Textphone: 0845 408 9577 e-mail: hse.infoline@natbrit.com or write to HSE Information Services, Caerphilly Business Park, Caerphilly CF83 3GG.

This leaflet contains notes on good practice which are not compulsory but which you may find helpful in considering what you need to do.

This leaflet is available in priced packs of 15 from HSE Books, ISBN 978 0 7176 2137 8. Single free copies are also available from HSE Books.
